John: At this time I have heard from one of our experts who suggested that you might want to have a procedure or protocol in place, in the event the that AN catches fire. I will be speaking with other experts Tuesday but wanted to pass this along now. Jim Klick

All,

Attached is the drat protocol for AN removal at the site.

I understand state and federal agencies want the removal to occur as soon as possible and before the inspection of June 3-4.

This protocol was put together in consultation with the AN manufacturer. A representative of the AN manufacturer was brought on site on Wednesday of last week to observe the rail car and its contents.

I would like to get approval for TCEQ on this plan or advise of changes.

I understand that the railroad, UP, is interested in removing the railcar once the AN is removed. They are on this e-mail and we ask they coordinate with Crane Engineering for this removal. It will require a protocol that is acceptable to the people on this e-mail.

When we have an approved plan to remove the AN and railcar we will pick a date to implement the plan. We plan to video that removal and share with all "interested parties".

We do not intend to have all "interested parties" attend the removal of the AN or the railcar.

John
